The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLSTC) is required.	HC			x	x
				HD			x	x

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Please delete the Driver, I will add it back and you can then send # C10 ( no H\* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS   Format=Alpha- numeric       Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
		HD				x	x	
		HG				x	x	
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha- numeric       Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF- CERTIFICATION Format=Alpha- numeric       Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENSE CODE	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,  
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Apparently the CDL was expired, which I am resolving. Regarding the medical self cert code, are you expecting the driver to have a medical certificate or just that this parameter is required?

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

Asma

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

There are no errors on the HD message this time.

On the H3 message, for the B26 ACD conviction, CONVICTION ID CODE is blank.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Gary,

# C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Thanks,

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Ok, since the CSOR is complete, can you please delete the AI pointer, so that I can re-add driver C and we can try the UD again?

Thank you

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,  
Siri.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

 Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3		HG			x	x
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Gary,

# C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW  
SOR, BUT DHR NOT READY') .

Thanks,

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,  
Siri.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

Gary,

The Last Match Indicator is being sent as 'N' on the HB message in error.

Please refer to the following section in SPEXS Master Specification:

I had another question, I am seeing that AI is sending HB in error in some test cases and SB in error in others. Just wanted to check with you.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 ( no H\* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLSTC) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLSTC)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

I was expecting # D2 in error "DUPLICATE CONVICTION", but received '9999 99TE CONVICTION'.

Can you please look.

Thanks,

There is a hole in the logic that needs to be fixed. I gather this needs to be addressed before completing the remaining Driver D tests.

Can you help explain D15-D17? I do not see why the behavior would change when issuing the request from A4 versus P6.

Gary,

Thanks for the explanation, I was just curious .

I was expecting # D15 to be in error "NOT CURENT SOR", which is working fine.

The only issue is Last Match Indicator on the HB Message in error.

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

The Last Match Indicator is being sent as 'N' on the HB message in error.

Please refer to the following section in SPEXS Master Specification:

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2						

Thanks,

Apparently the CDL was expired, which I am resolving. Regarding the medical self cert code, are you expecting the driver to have a medical certificate or just that this parameter is required?

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

There is a hole in the logic that needs to be fixed. I gather this needs to be addressed before completing the remaining Driver D tests.

Can you help explain D15-D17? I do not see why the behavior would change when issuing the request from A4 versus P6.

Gary,

Thanks for the explanation, I was just curious .

I was expecting # D15 to be in error "NOT CURENT SOR", which is working fine.

The only issue is Last Match Indicator on the HB Message in error.

Thanks,  
Asma

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

Gary,

The Last Match Indicator is being sent as 'N' on the HB message in error.

Please refer to the following section in SPEXS Master Specification:

I had another question, I am seeing that AI is sending HB in error in some test cases and SB in error in others. Just wanted to check with you.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

**Subject:** RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver C

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

# C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Ok, since the CSOR is complete, can you please delete the AI pointer, so that I can re-add driver C and we can try the UD again?

Thank you

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,  
Siri.

Ok, so if the SD was processed but a NF has not been received, the NSOR is allowed to make state history inquiry (SB). Should the NSOR be allowed to receive responses from SC and SG requests as well?

And while in this incomplete CSOR, if some other state makes an inquiry, then they should receive NOT CURRENT SOR with match indicator = Y and process status = 1, correct? Would that apply to SC, SG and also SD requests?

 Gary,

# D15 is sent when the CSOR is still in progress ( i.e., 'UD' message was sent and responses were received, but 'CC' message was not sent) .

When a CSOR is in progress, an OSOR can only respond to the NSOR :

CD04.LKU P.SB: 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x	x	x	NOT CURRENT SOR
---------------------------	---	--	---	---	---	---	---	-----------------

'CC' message is sent once # D15 and # D17 is completed.

Once the CSOR is completed, and the Jurisdiction is no longer the current SOR, it cannot respond with the status information ( Test Case # D17) :

CD04.LKU P.SB. 0400	Driver License Jurisdiction (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS   Format=Alpha- numeric   Size=2	If the record retrieved is a ( if a CSOR is not currently in involving the given driver, ; Jurisdiction had been but its current SOR then the SOR c with status information.

Let me know if you have any questions.

Thanks,  
Asma

There is a hole in the logic that needs to be fixed. I gather this needs to be addressed before completing the remaining Driver D tests.

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3		HG			x	x
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks  
Gary

Thanks, that is very helpful. I will be handing this work off to another developer so we can move on with testing. We likely will want to have a conference call to discuss once we analyze the details.

Is it ok then if we move on to Driver E? We have a test server issue and there will be a short delay.

Ok, so if the SD was processed but a NF has not been received, the NSOR is allowed to make state history inquiry (SB). Should the NSOR be allowed to receive responses from SC and SG requests as well?

And while in this incomplete CSOR, if some other state makes an inquiry, then they should receive NOT CURRENT SOR with match indicator = Y and process status = 1, correct? Would that apply to SC, SG and also SD requests?

Gary,

# D15 is sent when the CSOR is still in progress ( i.e., 'UD' message was sent and responses were received, but 'CC' message was not sent) .

When a CSOR is in progress, an OSOR can only respond to the NSOR :

CD04.LKU P.SB. 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x	x	x	NOT CURRENT SOR
---------------------------	---	--	---	---	---	---	---	-----------------

'CC' message is sent once # D15 and # D17 is completed.

Once the CSOR is completed, and the Jurisdiction is no longer the current SOR, it cannot respond with the status information ( Test Case # D17) :

CD04.LKU P.SB. 0400	Driver License Jurisdiction (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If the record retrieved is a ( if a CSOR is not currently in involving the given driver, ; Jurisdiction had been but is current SOR then the SOR c with status information.

There is a hole in the logic that needs to be fixed. I gather this needs to be addressed before completing the remaining Driver D tests.

Can you help explain D15-D17? I do not see why the behavior would change when issuing the request from A4 versus P6.

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in <b>Appendix D: Data Dictionary</b> (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha- numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF- CERTIFICATION Format=Alpha- numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENSE CODE	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

DCVCCA	CONVICTION OFFENSE DETAIL - ACD	1	
DCVJUR	JURISDICTION CODE - CONVICTING	1	AI

Can you please look.

Thanks,  
Asma

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H\* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Gary

Thanks, that is very helpful. I will be handing this work off to another developer so we can move on with testing. We likely will want to have a conference call to discuss once we analyze the details.

Is it ok then if we move on to Driver E? We have a test server issue and there will be a short delay.

Ok, so if the SD was processed but a NF has not been received, the NSOR is allowed to make state history inquiry (SB). Should the NSOR be allowed to receive responses from SC and SG requests as well?

And while in this incomplete CSOR, if some other state makes an inquiry, then they should receive NOT CURRENT SOR with match indicator = Y and process status = 1, correct? Would that apply to SC, SG and also SD requests?

Gary,

# D15 is sent when the CSOR is still in progress ( i.e., 'UD' message was sent and responses were received, but 'CC' message was not sent) .

When a CSOR is in progress, an OSOR can only respond to the NSOR :

CD04.LKU P.SB. 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x	x	x	NOT CURRENT SOR
---------------------------	---	--	--	---	---	---	---	-----------------

'CC' message is sent once # D15 and # D17 is completed.

Once the CSOR is completed, and the Jurisdiction is no longer the current SOR, it cannot respond with the status information ( Test Case # D17) :

CD04.LKU P.SB. 0400	Driver License Jurisdiction (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If the record retrieved is a ( if a CSOR is not currently in involving the given driver, ; Jurisdiction had been but is current SOR then the SOR c with status information.
---------------------------	--	---	---

Let me know if you have any questions.

Thanks,  
Asma

There is a hole in the logic that needs to be fixed. I gather this needs to be addressed before completing the remaining Driver D tests.

Can you help explain D15-D17? I do not see why the behavior would change when issuing the request from A4 versus P6.

Gary,

Thanks for the explanation, I was just curious .

I was expecting # D15 to be in error "NOT CURENT SOR", which is working fine.

The only issue is Last Match Indicator on the HB Message in error.

I'm investigating why the driver was not found.

Effectively S\* is being returned if there are validation errors of parameter values. H\* is returned with processing errors. Let me know if this is not correct and if you would expect all errors to be returned in the H\* message.

Gary,

The Last Match Indicator is being sent as 'N' on the HB message in error.

Please refer to the following section in SPEXS Master Specification:

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Gary,

# C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Thanks,

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,  
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Can you please clarify the Driver E setup step:

- Driver E has all 3 occurrences of Card History populated.

If this is associated with AKA STATE DOCUMENT TYPE and  
AKA STATE DOC REAL-ID CONFORMANT we do not store this information.

Can you please clarify the Driver E setup step:

- Driver E has all 3 occurrences of Card History populated.

If this is associated with AKA STATE DOCUMENT TYPE and  
AKA STATE DOC REAL-ID CONFORMANT we do not store this information.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Yes, the S92 ACD conviction code was sent without the detail, hence in the error "INVALID CONV OFF DETAIL FOR ACD CONV CODE = S92":

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Sure Gary,

You can add the pointer without Card History since you don't store the AKA State Doc Type and AKA Real ID.

Can you please clarify the Driver E setup step:

- Driver E has all 3 occurrences of Card History populated.

If this is associated with AKA STATE DOCUMENT TYPE and  
AKA STATE DOC REAL-ID CONFORMANT we do not store this information.

**Attachments:** 2017 AIC Travel Assistance Expense Report-Rev1.pdf; AIC 2017 Travel Assistance - Letter to Contributing Agencies.pdf

This is a group distribution email. Please do not reply all.

Dear Chief Administrators,

In April, I informed you in the attached memo of the continued Annual International Conference (AIC) travel assistance program that provides member jurisdictions in good standing up to \$4,500 USD for use to attend the 2017 AIC in San Francisco, CA. I am pleased to now let you know that this amount has been increased to \$6,000 in recognition of the expense level needed for this year's conference. We know that some members have had challenges reserving rooms at the conference rate which will require paying a higher room rate. Hopefully, the additional funding will support members' paying these increased costs.

The AAMVA team continues discussions with hotel management in hopes of making more rooms available at the conference rate. If this occurs, we will provide a further update. In the meantime, please [register for the AIC](#) and make your travel and hotel plans accordingly, knowing you may allocate the \$6,000 across airline, hotel, conference registration, and/or per diem costs for as many people as it will cover.

If you have any other questions about the conference or our travel assistance program, please feel free to contact [Ian Grossman](#) or [Dianne Graham](#). Thank you.

Sincerely,

Anne

## MEMO

TO: AAMVA Chief Administrators of Dues-Paying Agencies

FROM: Anne Ferro, AAMVA President & CEO

DATE: Wednesday, April 19, 2017

RE: Travel Assistance for 2017 Annual International Conference

I am pleased to report that, for the ninth year, the AAMVA International Board of Directors will make support funding available for member jurisdictions in good standing to attend the AAMVA Annual International Conference (AIC). A "member in good standing" is defined as a jurisdiction that is current on its membership dues and fees.

AAMVA will provide up to \$4,500 USD to each jurisdiction for use by the dues-paying agency to attend the 2017 AIC in San Francisco, CA. If your jurisdiction's dues are divided between two agencies, the funding will be divided equally between the agencies; if three agencies share the dues, then 1/3 will be allocated to each agency. You are receiving this information because you are Chief Administrator of a dues-paying agency.

To maximize flexibility, you may allocate the \$4,500 across airline, hotel, conference registration, and/or per diem costs for as many people as the \$4,500 will cover. All attendees will register for the meeting via the AAMVA website and pay the jurisdiction rate. You will book your own hotel reservations and pay for the incidentals needed to attend. After the meeting, each jurisdiction will provide AAMVA travel expense forms for each employee or each agency for reimbursement.

In addition, the Board approved funding to support AIC attendance by the chief highway safety law enforcement executive of your jurisdiction (or their executive level designee) in the case where that agency is not in any way responsible for AAMVA dues. If this is the case in your jurisdiction, I plan to send a letter the week of April 24<sup>th</sup> inviting them to use this law enforcement funding. If you would prefer to extend this invitation directly to your law enforcement partner, please [email](#) or call me before April 21st.

If you have any other questions about the conference or our travel assistance program, please feel free to contact [Ian Grossman](#) or [Dianne Graham](#) on the AAMVA team. Thank you.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

 Gary,

Yes, the S92 ACD conviction code was sent without the detail, hence in the error "INVALID CONV OFF DETAIL FOR ACD CONV CODE = S92":

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Yes, the S92 ACD conviction code was sent without the detail, hence in the error "INVALID CONV OFF DETAIL FOR ACD CONV CODE = S92":

Can you please add the detail when sending the H3 message .

Thanks,

Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

I need to send the 2<sup>nd</sup> UG message.

Once I send, duplicates will be resolved and NE messages will be sent out.

Sending UG ..

Thanks,  
Asma

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Sure Gary,

You can add the pointer without Card History since you don't store the AKA State Doc Type and AKA Real ID.

**Subject:** National Driver Register Cleanfile - September 17, 2017

PDPS Participants:

The National Driver Register will conduct a Cleanfile on September 17<sup>th</sup>, 2017.

Cleanfile is an optional process. It is a means for jurisdictions to refresh the pointers it has on PDPS. NDR replaces all pointers on the PDPS file with the Cleanfile set of pointers sent by the jurisdiction. In order for a pointer to be included in the Cleanfile, the associated record in the jurisdiction must contain a conviction or withdrawal specified in 23 CFR Part 1327 section 1327.5 (a) or in Appendix A to that rule.

To participate in this Cleanfile, please email NDR by September 6<sup>th</sup>, 2017, and plan to send your file to NDR no later than September 13<sup>th</sup>, 2017.

Cleanfiles must be submitted via Secure FTP or FTP. Please schedule a test of SFTP/FTP connectivity with NDR before attempting to send the full Cleanfile.

If you plan to participate in this Cleanfile or if you have any questions please contact the NDR Office by sending an e-mail to [NDR\\_Operations@dot.gov](mailto:NDR_Operations@dot.gov)<[mailto:NDR\\_Operations@dot.gov](mailto:NDR_Operations@dot.gov)>.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .

- On the H3 Message there are 3 convictions – S14, S92 and S16.

S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

**ACD Manual:**

Can you please look.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLIS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

**ACD Manual:**

AAMVA Code Dictionary (ACD) - Release 5.0.0

**Table 18. Withdrawal Disqualification Periods**

Withdrawal Disqualification Periods			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
FMCSR	FMCSR Disqualification Period	ACD	ACD Code Description
383.51(b)(9)	Lifetime	A50	First violation of using a motor vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance. (ineligible for reinstatement)
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W27	Failure to make an appointment within 30 days of receiving notification that re-testing is necessary [when fraud is suspected]
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W28	Failure to retest or failure of scheduled test(s) [when fraud is suspected]
383.51(c)	60 days for second serious offense w/in 3 yr	W30	Two serious violations within three years

Can you please look.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Sure Gary,

You can add the pointer without Card History since you don't store the AKA State Doc Type and AKA Real ID.

Thanks,

Can you please clarify the Driver E setup step:

- Driver E has all 3 occurrences of Card History populated.

If this is associated with AKA STATE DOCUMENT TYPE and  
AKA STATE DOC REAL-ID CONFORMANT we do not store this information.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLIS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Gary,

I need to send the 2<sup>nd</sup> UG message.

Once I send, duplicates will be resolved and NE messages will be sent out.

Sending UG ..

Thanks,

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Thanks,  
Asma

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

Once Mina is back, can you please check with her and see why AK doesn't populate the Accident Locator on the H4 Message?

Can we move on to # E14?

Thanks,

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

#### ACD Manual:

AAMVA Code Dictionary (ACD) - Release 5.0.0

**Table 18. Withdrawal Disqualification Periods**

<b>Withdrawal Disqualification Periods</b>			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
<b>FMCSR</b>	<b>FMCSR Disqualification Period</b>	<b>ACD</b>	<b>ACD Code Description</b>

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?
